

1) Find the equivalent fraction of $\frac{2}{5}$ with numerator 6.

Ans $\frac{2 \times 3}{5 \times 3} = \frac{6}{15}$

(ii) Find equivalent fraction of $\frac{15}{35}$ with denominator 7.

$$\frac{15 \div 5}{35 \div 5} = \frac{3}{7}$$

iii) Find equivalent fraction of $\frac{2}{9}$ with denominator 63.

Ans $\frac{2 \times 7}{9 \times 7} = \frac{14}{63}$

1) Find the equivalent fraction of $\frac{3}{5}$ having
(a) D^o 20 (b) N^o 9
(c) D^o 30 (d) N^o 27

2) Find equivalent fraction of $\frac{36}{48}$ with

(a) N^o → 9

(b) D^o → 4
