How do Organisms Reproduce?

Ovary changes into fruit and other parts of flower fall off.

Germination of pollen on stigma

→ The seed germinates to form a plant under suitable conditions such as air, moisture etc.

Reproduction in Human Beings

→ Humans use sexual mode of reproduction.

→ Sexual maturation: The period of life when production of germ cells i.e. ova (female) and sperm (male) start in the body. This period of sexual maturation is called puberty.
