Class 10th

Sub. Biology

Date:- 26.11.20

Biological magnification: The concentration of harmful chemicals increases with every next trophic level in a food chain. This is called biological magnification.

→ Maximum concentration of such chemicals get accumulated in human bodies as human occupy the top level in any food chain.

Food web

→ In nature large numbers of food chains are interconnected forming a food web.

• **Environmental problems:** Changes in the environment affect us and our activities change the environment around us. Human activities leads to pollution, deforestation etc.
