Functions

There are different types of functions

- ❖ **SUM** – It is used to add all the values provided as argument
- ❖ **Average** – This function calculates the average of all the values provided as argument
- ❖ **Count** – This function counts the number of cells that contain number
- ❖ **Max** – This function is used to return maximum value from a list of arguments.
- ❖ **Min** – This function is used to return minimum value from a list of arguments.

Charts

These are the graphical and pictorial representation of worksheet data

1. Types of Charts.

There are various types of charts

- ❖ Area charts: It emphasises the magnitude of change over time
- ❖ Column Chart : It shows data changes over a period of time or illustrates comparisons among items
- ❖ Bar chart : It illustrates comparisons among individual items . Categories are organised vertically and values horizontally
- ❖ Line chart : It shows trends in data at equal intervals. It is useful for depicting the change in a value over period of time.
- ❖ Pie chart : It shows the proportional size of items that make only one data series to the sum of the items
- ❖ XY (Scatter) Chart : It shows the relationships among the numeric values in several data series or plots two groups of numbers as series of XY coordinates. Scatters compares pairs of values.
