UNIT 7: DATABASE DEVELOPMENT (BASIC)

❖ Other Data Types:

Name	Description
Other/Object	Stores serialized java object user application must supply serialization routines

- ❖ Primary key in Data base:-A Primary key is a unique value that identifies a row in a table. Primary keys must contain UNIQUE values, and cannot contain NULL values. A table can have only One primary key; and in the table, this primary key can consist of single or multiple columns (fields).
- ❖ Primary keys are also indexed in the databases, making it faster for the database to search a record.
