Working Note:

Calculation of annual depreciation

Depreciation (p.a.) =
$$\frac{(56,000 + 28,000 - 6,000 + 28,0$$

Note: As per the solution, the balance of provision for depreciation account, as on March.31, 2015 is Rs 11,850; whereas, as per the book, it is Rs 18,200.

However, if we ignore the scrap value and prepare provision for depreciation for 4 years, the answer would match to that of the book.
