

PAINTING STUDY MATERIAL FOR CLASS 11TH BASED ON NCERT

RADHAKISHOR MONDAL Date : 02/09/20

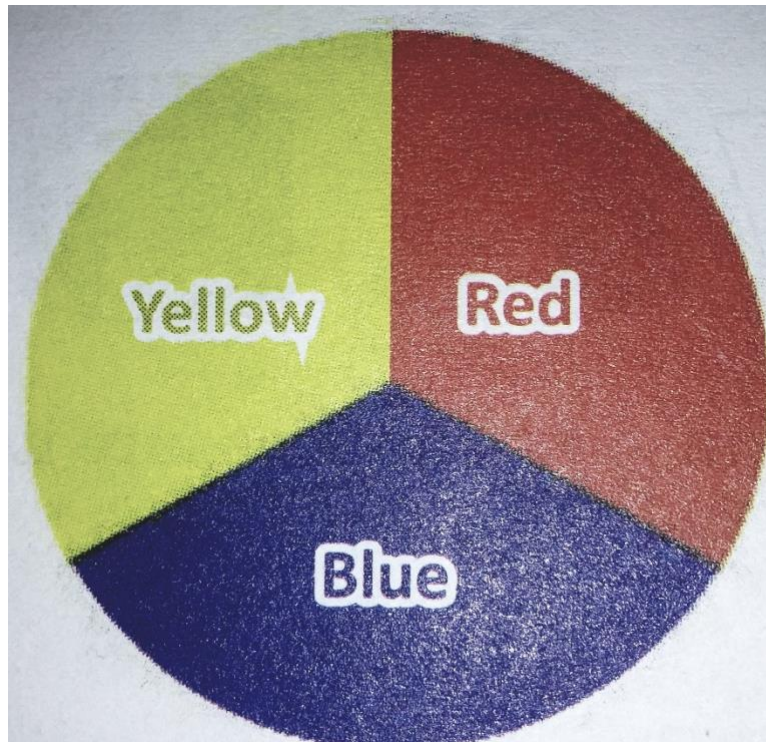

Proportion :

Each object in the painting should be in proportion. For this, correlate the size of the object given in the picture in respect to distance between or among them. Each part of an object should also be in exact ratio and in perfect shape.

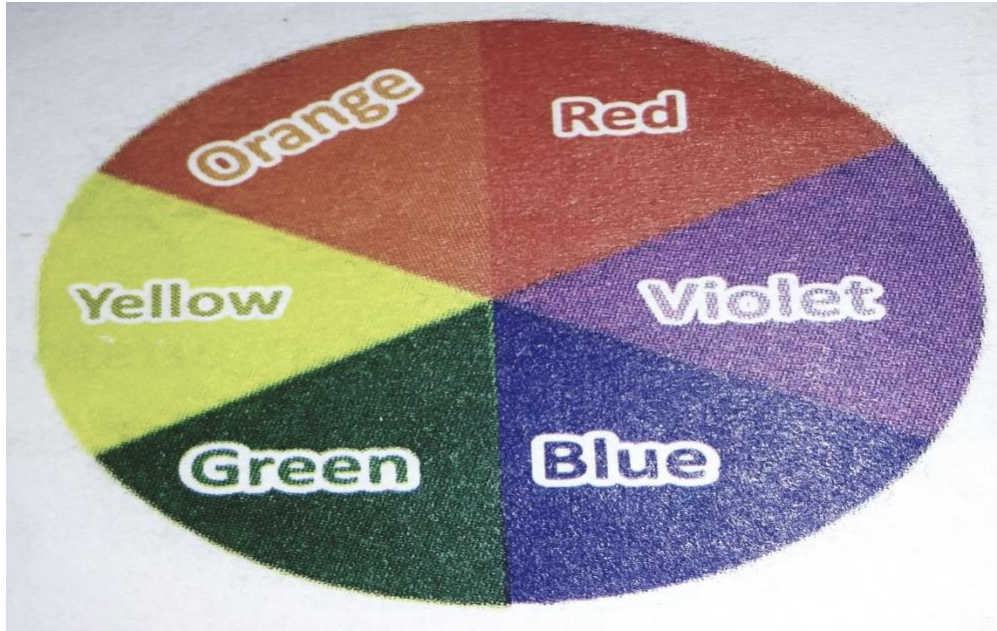

Colour :

There are three basic colours – red, blue, and yellow.

After mixing of these colours in same ratio, we will get other secondary colour. Having mixed them in different ratio, we will get a great variety of shades.

Basic colour
