1. Observe the pictures carefully and fill in The blanks. (According to Multiplication Fact and DIVISION fact . )

15 apples are divided among 5 friends. How many apples does each friend get ?

**Solution :**

 **Method 1**

Start by giving 1 apple to each friend. Stop when you are left with no apples.

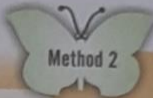

Step 1 :  $15 - 5 = 10$

Step 2 :  $10 - 5 = 5$

Step 3 :  $5 - 5 = 0$

We subtracted 5 from 15 three times to get 0.

So, each friend gets 3 apples.

 **Method 2**

Say the table of 5. Stop when you reach 15.

$1 \times 5 = 5$

$2 \times 5 = 10$

$3 \times 5 = 15$

From this, we get  $15 \div 5 = 3$

So, each friend gets 3 apples.

Look at the pictures carefully and fill in the blanks.
