

VIDYA BHAWAN BALIKA VIDYAPEETH LAKHISARAI

CLASS – 2.

DATE – 28.08.21

SUB – MATHS

S . T . – PRAGYA

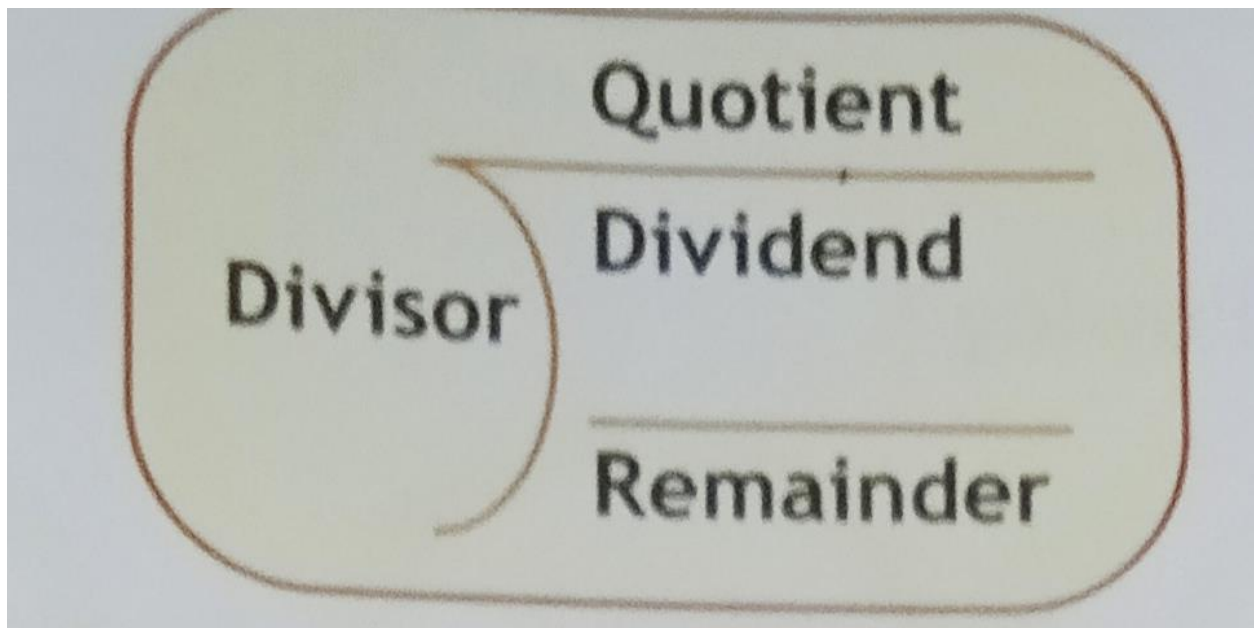

Based on N.C.E.R.T Pattern

CH – DIVISION

Division with long method and verification .

See example - Divide 6 by 3 .

$$\begin{array}{r} 2 \\ \hline 3 \overline{) 6} \\ \underline{6} \\ 0 \end{array}$$

Verification : To check the

Dividend= Quotient × Divisor

+ Remainder

In above sum

Quotient= 2 , Divisor = 3

Remainder= 0

$$2 \times 3 + 0 = 6 \text{ (Dividend)}$$

So, the division is correct.

In C. w – solve page 110 ,

According to example.

H. W. – Divide page 112.
