## **DOCTOR**

***A doctor helps us to stay healthy . He / She works in a hospital or in a clinic . When we fall sick or get injured , we go to a doctor . The doctor checks us and tells us the medicines we should take . He / She also tells us what to eat when we are sick . We should always follow the advice of the***

**doctor. Every city has a hospital and big cities have many hospitals . Many doctors and nurses work in a hospital . When a person is very ill , he has to stay in a hospital till he is cured . Every big village has a dispensary. A number of village dispensaries work under a primary health centre . Sometimes medical camps are organised for the villagers . There are veterinary hospitals in cities and villages . In these hospitals , sick animals are treated . The doctors who treat animals are called veterinary doctors .**

**Draw an First Aid box colour it .**
