CHAPTER-12,DATA HANDLING

BASED ON NCERT PATTERN

- **READING THE TABLE**

Gargi and Pranav went to a zoo. In the zoo they saw four different types of animals—lions, parrots, giraffes and monkeys. This is what they noted down.

ANIMAL	Lion	Parrot	Giraffe	Monkey
NUMBER	3	6	3	9

Read the above table carefully and answer the following questions.

a How many giraffes are there ? → 3

b How many parrots are there ? → 6

c How many animals live in the zoo altogether ? → $3+6+3+9=21$

d The zoo has 3 lions. What else does the zoo have 3 of ? → giraffes

e How many more monkeys does the zoo have than lions ? → $9 - 3 = 6$

f How many giraffes and monkeys does the zoo have altogether ? → $3 + 9 = 12$

g If the zoo gets five more monkeys, how many does it have now ? → $9 + 5 = 14$

Homework-Write and learn it.
