BASED ON NCERT PATTERN

Divide 45 by 6.

Read the multiplication table of 6 till the product is 42.

When 6 is multiplied with 7, we get 42 ($6 \times 7 = 42$).

We subtract the product (42) from the dividend (45).

($45 - 42 = 3$) The remainder is 3.

Verification :

Dividend – Quotient x Divisor + Remainder

In the above sum,

Quotient = 7, Divisor = 6, Remainder = 3

$$= 7 \times 6 + 3$$

$$= 42 + 3$$

$$= 45 \text{ (Dividend)}$$

So, the division is correct.
