CHAPTER-10, TIME

Page no.-163

1 hour = 60 minutes

Half an hour = 30 minutes

- Telling time – half past the hour

One hour has 60 minutes, and half an hour has 30 minutes. When the minute hand moves from 12 to 6, it means half an hour has passed.

Now look at this clock's face. The hour hand (short hand) is half way between 3 and 4. The minute hand (long hand) is at 6.

So, the time is **3:30**. When we read the time, we say **30 minutes past 3** or **half past 3**.

Similarly, in this clock, the hour hand is in between 8 and 9 and the minute hand is at 6. Therefore, the time is 8:30 or 30 minutes past 8 or half past 8.

**Homework-Write it clearly in your notebook and remember it.**
