BASED ON NCERT PATTERN

Telling Time -Quarter past and Quarter To

Quarter Past
When it is 15 minutes past the hour, we say it is quarter past the hour.

Quarter past = 15 minutes.

For example, in this clock, the hour hand is just a little ahead of 12, and the minute hand is at 3. Therefore, the time is 12:15 or quarter past twelve.

Quarter To
When it is 45 minutes past the hour, we say it is quarter to the next hour.

Quarter to = 45 minutes.

For example, in this clock, the hour hand is between 12 and 1 but slightly closer to 1. The minute hand is at 9. Therefore, the time is 12 hours 45 minutes or 12:45 or quarter to 1.
