Chapter-17, Our Universe

Points to remember:-

Stars:-

- A star is a giant mass of very hot, glowing gas.
- Stars produce their own light and energy.
- The Sun is the star nearest to the Earth.

The Sun:-

- The sun is a great ball of fire .
- It is the biggest and brightest body in our solar system.
- The Sun is 150 million kilometers away from the Earth.
- The Sun rises in the East and sets in the west.
