KUMARI

**\*BASED ON NCERT PATTERN\***

Chapter-17, Our Universe

**Points to remember:-**

**Weather:-**

- **The Earth has a layer of air around it called the atmosphere.**
- **Changes in the atmosphere, such as the presence of clouds , winds and water vapour, make a place hot or cold. This is known as the weather.**
- **The weather can be hot or cold , cloudy or sunny, windy or rainy.**

**Climate:-**

- **The climate of any place is the average weather of that place for many years.**

**Seasons:-**

- **Changes in the weather Patterns are known as seasons.**
- **Summer, monsoon, autumn, winter and spring are the five important seasons in India.**

**Homework-Write and learn.**
