TIME DURATION-

Time is used to show when an event happens . Time is also used to find for how long an event goes on . Consider the following examples.

Example-

- 1. Reena goes shopping at 2O 'clock and returns at 6O'clock.
Hownlong does she spend at the shops?**

**Answer-Reena's starting time is 2 O'clock,
and finishing time is 6O'xlock**

Therefore, duration of shopping is $6 - 2$, that is 4 hours.

- 2. If a sports event starts at 4 o' clock and lasts for 5 hours ,
what time does it finish ?**

Answer- The starting time is 4o'clock and the duration is 5 hours . Therefore , the finishing time is $4+5$ that is 9o'clock.
