BASED ON N.C.E.R.T PATTERN

CH- ( DIVISION )

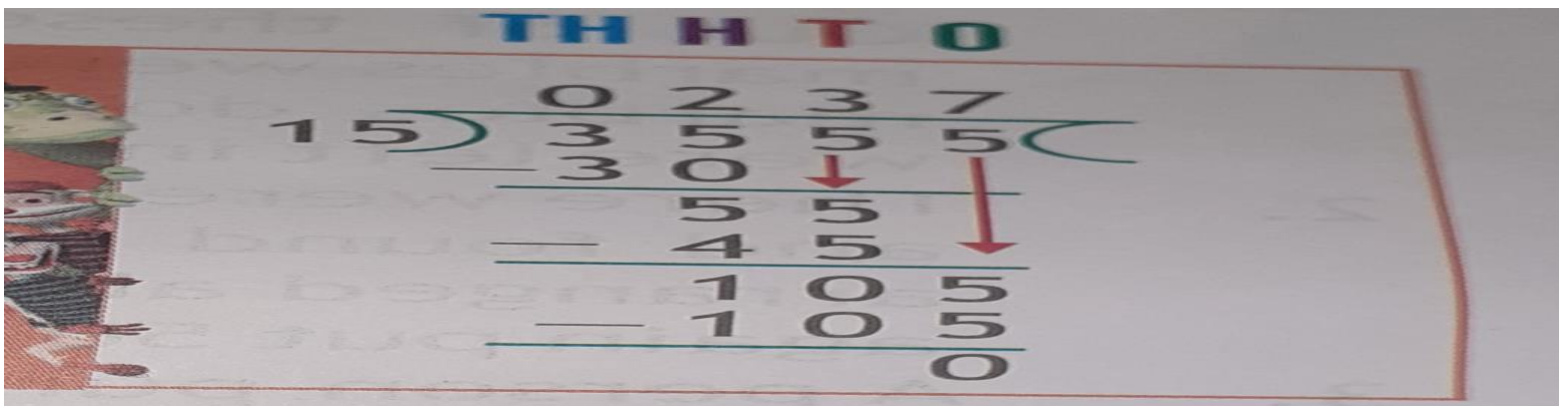

See example carefully:-

Example :- In a bookshop ,3,555 books were put  
In 15 cartons , with equal number of books in all  
the cartons. How many books were put in each  
carton?

Solution:- Number of books put in 15 cartons  
= 3,555

Number of books in 1carton =  $3,555 \div 15 = 237$

Answer : In each carton ,237 books were put .

## PRACTICE SHEET

Read the following stories carefully , and solve.

5. Rajveer has 750 balloons. He kept 150 for himself, and distributed the remaining balloons among 10 children. How many balloons did each child get?
6. There are 13 pineapple pastries in a box. The box also contains mango pastries which are 5 times the number of pineapple pastries. How many pastries are there altogether in the box?
7. Add the product of 273 and 58 to the product of 189 and 43.
8. A man bought 20 dozen red pins and 13 dozen blue pins. He arranged all the pins in 4 boxes equally. How many pins were there in each box?
9. In a division sum, the divisor is 7, the quotient is 73 and the remainder is 1. What is the dividend?
10. A basket contains 102 dozen bananas, out of which 13 bananas are rotten. The rest of bananas are shared equally among 16 children. How many bananas does each child get and how many good bananas are left in the basket?

Keyword and solve.
