

OUR BODY

SUBJECT TEACHER-SONI KUMARI

STOMACH

The stomach is a muscular bag . It is J – shaped . It lies below the chest . The stomach helps in the break down of food in to smaller pieces which is then digested. The stomach also secretes gastric juices that help in proper digestion of food in body .

LIVER

The liver is a reddish – brown organ located on the right side of the stomach . It is the largest organ in our body . The liver is protected by the ribs . It's main function is to digest food and to clean blood .

KIDNEYS

The kidneys are a pair of bean – shaped organs . They are located in the lower part of the abdomen . The main function of kidneys is to filter blood and remove waste out of the body in the form of urine . Kidneys are called the cleaning Plants of the body .

Don't write only read it .
