Chapter-3

Eating habits of Animals

Answer these questions.

1- What is gnawing the food?

Ans .- Rodents have long and flat front teeth to bite hard nuts and fruits. This is called gnawing the food.

2- What do you understand by chewing the cud?

Ans .- Ruminants eat the same food twice. First they swallow it and later they bring the

swallowed food back into their mouth and chew it well. This is called chewing the cud.

3 What is proboscis?

Ans.- Proboscis is the long tube like tongue of a butterfly.

4- do elephants catch their food?

Ans .- Elephants catch their food with their long and thick trunk.

5. – Explain the food chain?

Ans.- All animals depend on plants directly or indirectly for food some animals eat plant. Some eat plant eating animals. This forms a sort of chain and is called food chain.

Homework-Write and Remember it.
