Peacock

Peacock is one of the most beautiful birds of the earth.

Peacock usually has blue colour and its feathers having mixture of blue, green, golden colours.

Peacocks are found in India, Sri Lanka, Indonesia, and Africa etc.

Peacocks look attractive due to their colourful feathers.

Peacocks look beautiful when it dances in rain by spreading its feathers.

Peacocks can fly up to some heights of branches but cannot fly in the sky.

The big tail of peacocks and less body weight prevent them to fly high.

In night peacocks go on the tree to save themselves from attackers.

The male bird is called as peacock and female bird is called as peahen.

Generally, the life of a peacock is up to 10 to 25 years.

Peacock is the national bird of India.

H.W Write and remember it
