Environmental Pollution

1. Environmental Pollution is a biggest issue in our today's world.
2. Basically Environment is our natural atmosphere and it is very important for our living.
3. We the human being are the main reason to pollute this environment.
4. There are several types of environmental pollution such as water pollution, air pollution, sound pollution, soil pollution, and so on.
5. The reason behind water pollution is excessive use of factories and chemicals.
6. As we are using lots of motor vehicles so it is one of the main reason of sound pollution.
7. Factories produce lots of polluted gases which are the reasons to make air pollution.
8. And factories unnecessary products like disposable plastics and harmful chemicals mixed with soil and the reason being soil become polluted.
9. We are the main reason of this environmental pollution so only we could resolve these.
10. Tree plantation is one of the best solution to recover this Environmental Pollution it purifies the air, soil and nature become fresh.

Homework- write them beautifully in your notebook.
