BASED ON NCERT PATTERN

Chapter-9, States of Matter

B. Give reasons

1. Why are liquids called fluids also?

Answer-Liquids are also called fluids because they can flow easily from higher concentration to lower concentration.

2. Why can't ice take the shape of the container in which it is put?

Answer- Ice is a solid and solid do not change their shape when shifted to other containers.

Homework-Write them beautifully in the notebook and learn.
