Chapter-2,3and 4

Give reasons.

1. Leaves are known as the 'kitchen of the plant'.
→ This is because they prepare food for the plant.
2. Veins are very important part of leaves.
→ This is because they transport water, nutrients and food from one part to another.
3. Birds have hollow bones.
→ This enables them to fly.
4. Duck has Webbed feet.
→ This helps them to swim in water.

Fill in the blanks.

1. Mother bird sits on the eggs to keep them warm and this process is called incubation.
2. A kingfisher makes a nest on the banks of river.
3. Woodpecker has a strong chisel shaped beak.
4. Crow and sparrow are perching birds which have 3 toes in front and one toe at the back.
5. Study of the bird is called ornithology.
