Chapter-2, Our body

D. Answer the following questions.

1. Differentiate between external and internal organs.

Answer- External organs- Visible parts of our body are called as external organs. Example- eyes, ears , nose.

Internal organs- Parts of body that are not visible and present inside are called internal organs. Example- brain, heart, lungs, stomach.

2. Why is brain called the 'master organ of the body'?

Answer- The brain controls all the functions of our body such as movements, breathing, heartbeats and emotions so it is called the 'master organ of the body'.

3. What is the main function of the heart?

Answer- The heart pumps blood to all parts of the body.

4. What is the main function of the liver?

Answer- The main function of the liver is to digest food and clean blood.

5. Why are the kidneys called the 'cleaning plants of the body'?

Answer-The main function of the kidneys is to filter blood and remove waste out of the body in the form of urine so they are called as the cleaning plants of the body.

Homework-Write and Remember it.
