CHAPTER 2. TEETH

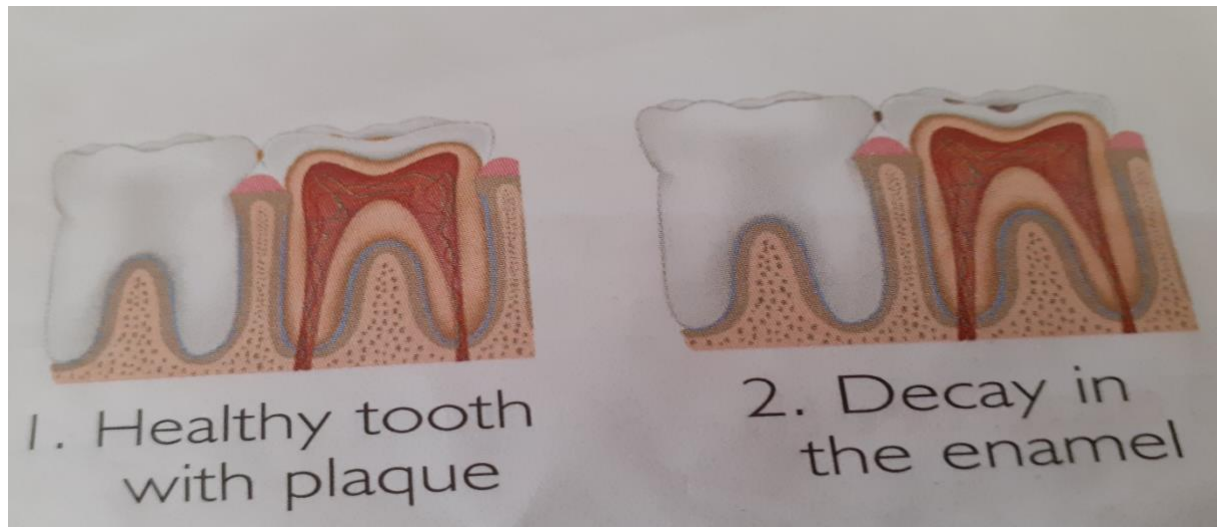

Dear students ,

The explanation of topic we will continue today is :

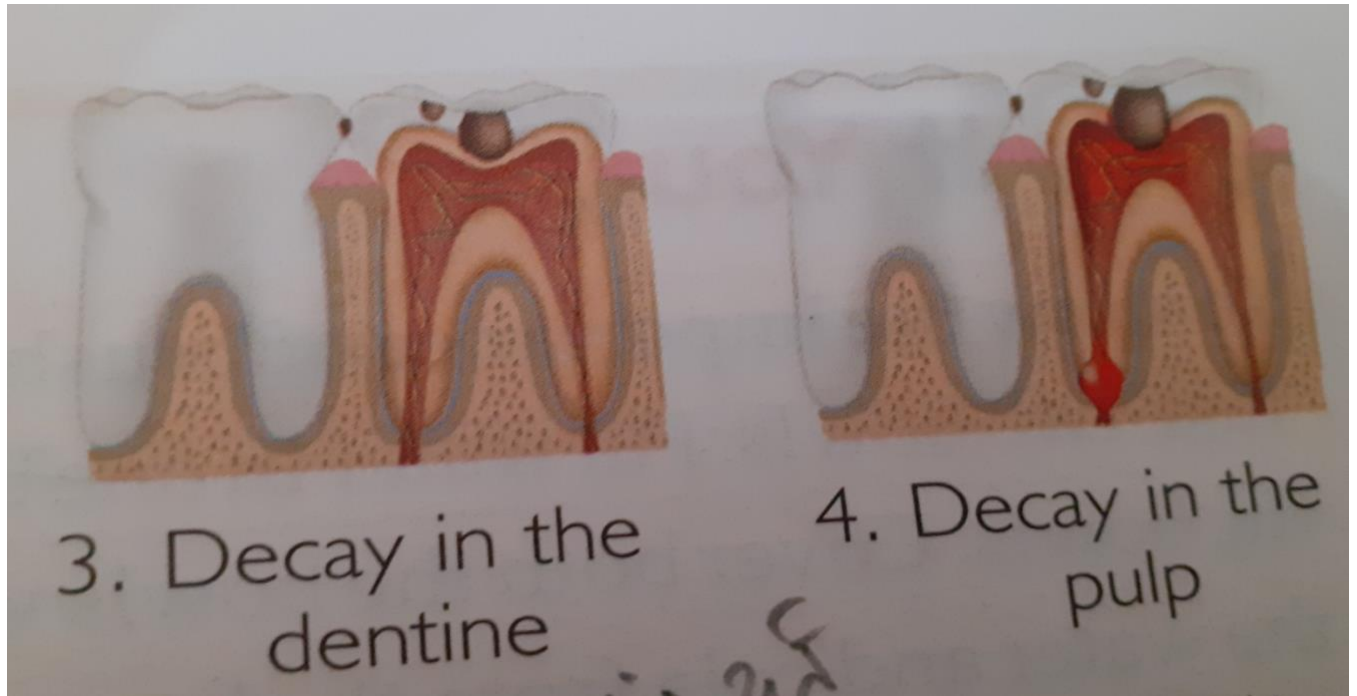

Causes of cavities and tooth decay :

When we eat food eat small particles that struck in the spaces between the teeth . If we do not brush teeth properly every day , these particles form a sticky layer called **plaque.**

Bacteria start feeding on this **plaque and produced acid. The acid slowly**

attack the enamel layer and make a hole in the tooth the bacteria than reached the dentine layer and finally to the blood . when bacteria damage the pulp , they cause pain this is called **tooth decay black spot after appear on the decayed tooth . The tooth decay is related to many problems like bad breath , toothache ,bleeding gums , cavities and indigestion.**

**TO BE
CONTINOUE.....**
