Class 4

Lesson: 4 (C)

Dear students

Today you are going to solve some words problem questions. To solve this types of questions you have to read questions first and understand whether it is adding or subtraction. So lets start.

Q1. There are 29,435 bags of rice, 49,233 bags of sugar in a godown. Find the total number of bags in godown?

Solve:- Total bags of rice = 29,435

Total bags of sugar = 49,233

So total bags are in godown = 29,435 + 49,233

= 78,668 bags

Solve these questions.

- There are 59,394 men 89,298 women and 26,438 children respectively in a town. Find the total population of the town?
- In an election, three candidates got 45,473 and 57,442 and 52,294 votes respectively .How many votes were polled altogether?
- A library has 29,198 books in English,52,935 books in hindi and 3,998 books in mathematics. How many books are there in altogether in the library?
- Four rolls of wire measure 15,277 meter,38,914 meters,43521 meters and 19,394 metres respectively. Find the total length of wire in the four rolls?
- Subtract the sum of 5,631 and 64,378 from 75,35,671.
