**Class 4**

**Lesson 6 F      **Division****

**Dear students,**

**You are learning Division and also you are verifying Division whether it is true or false. Today you will learn Division of a number by 10,100,100 etc.**

**You must note down given examples and practice more and more because maths demands practice so I hope you will get practice.**

Division

Division of a number by 10, 100, 1000, etc.

Q- write the quotient and remainder without actual division

(a)  $952 \div 10$

=> We are dividing 952 by 10

So, in number 10, one zero(0)

so we put decimal (.) after one digit.

$$\begin{array}{r}
 952 \div 10 \\
 = 95.2 \\
 \downarrow \quad \swarrow \\
 \text{Quotient} \quad \text{Remainder}
 \end{array}$$

So, Quotient = 95  
Remainder = 2

(b)  $3745 \div 1000$

$$\begin{array}{r}
 \Rightarrow 3.754 \\
 \downarrow \quad \swarrow \\
 \text{Quotient} \quad \text{Remainder}
 \end{array}$$

So, Quotient = 3  
Remainder = 754

Teacher's Signature: \_\_\_\_\_

$$(b) 1347 \div 100 \quad (c) 4578 \div 1000$$

$$(d) 457 \div 100 \quad (e) 3045 \div 10$$

$$(f) 478 \div 10 \quad (g) 789 \div 10$$

$$(h) 47089 \div 1000 \quad (i) 57043 \div 100$$

2. Divide and verify.

$$(a) 7843 \div 17$$

$$(b) 7695 \div 13$$

$$(c) 34095 \div 20$$

$$(d) 57043 \div 21$$

$$(e) 37859 \div 24$$

$$(f) 38435 \div 25$$

$$(g) 70003 \div 7$$

$$(h) 3008 \div 11$$

$$(i) 65432 \div 10$$

$$(j) 78543 \div 16$$
