BASED ON N.C.E.R.T PATTERN

CH- METRIC MEASURES

DIVISION IN THE UNITS OF MASS :

We divide in units of mass similar to that of numbers. Only take care to write units (kg , g)

With the quotient.

Example :- Divide : 7 2 0 g by 4

we divide
(kg, g) with the quotient.
Divide : 720 g by 4

$$\begin{array}{r} 4 \overline{) 720} \quad (180 \\ \underline{-4} \\ 32 \\ \underline{-32} \\ 00 \end{array}$$

$\therefore 720 \text{ g} \div 4 = 180 \text{ g}$

$$720 \text{ g} \div 4 = 180 \text{ g}$$

Divide the following:-

a. $868 \text{ g} \div 7$

b. $672 \text{ g} \div 4$

c. $392 \text{ g} \div 4$

d. $384 \text{ g} \div 12$

e. $132 \text{ g} \div 11$

f. $972 \text{ g} \div 12$

g. $655 \text{ kg} \div 5$

h. $360 \text{ kg} \div 8$

i. $1000 \text{ kg} \div 10$
