ADAPTATION IN ANIMALS

SUBJECT TEACHER-SONI KUMARI

E . Answer the following questions :

3 . Write three kinds of adaptations in aquatic animals .

Ans : - These are the different types of adaptation in aquatic animals

They use their gills to breathe .

They are water proof bodies .

Their fins / paddle like limbs help them to swim .

4 . What is camouflaging ? Give three examples of animals that camouflage .

Ans : - Camouflage means ' the ability of an animal to change its colour to merge with its

Surroundings , making it difficult to be spotted by other animals ' .

A chameleon can change its body colour according to its surroundings .

Giraffes have a coat that help them to hide themselves from their enemies .

Zebras have stripes on their bodies that help them to merge with their surroundings .

5 . What are Parasites ? Give their two examples .

Ans : - Parasites are the animals that live either on or inside the bodies of other animals .

Ex – Round worm , Tapeworm
