CLASS – 4

CHAPTER – 5

DATE – 06-07-20

ADAPTATION IN PLANTS

SUBJECT TEACHER – SONI KUMARI

In previous class we have already completed

Terrestrial Plants

Plants that grow in deserts

The plant that grow in deserts , the roots go deep

Under the ground to absorb water from the soil

Quickly .

The stem of the plant is green and it contains

chlorophyll .

It prepares food for the plant and also store

Water .

Ex – cactus , date palm , babool and keekar .

Don't write only read it .

B . Give reasons .

1 . Desert plants have no leaves or very few
Leaves

To reduce the loss of water .

2 . Water hyacinth has bulb – like swellings .
It helps in floating .

HOME WORK

Do CW in HW

To remember CW .

Send in audio .
