ADAPTATION IN PLANTS

DATE 15-07-20

SUBJECT TEACHER – SONI KUMARI

Based on NCERT pattern

### PLANTS OF THE GRASS FAMILY

You must have seen green grasses in lawns and parks .

But , these are not the only grasses .

The grass family has a variety of plants like wheat , paddy , maize , barley and oats .

These grasses are called cereals .

Their seed are called grains .

These are the main parts of food .

Bamboo is also a grass .

It is the biggest plant of the grass family .

Bamboo is used in making Basket , brooms and paper .

Don't write only read it .

C . Write True or False :

1 . Plants growing in deserts have lots of leaves .

- 2 . Floating Plants have fibrous root system .
- 3 . Non – green Plants get their food from the dead plant and animals .
- 4 . Bamboo is the tallest grass .
- 5 . Insectivorous Plants do not have green pigment called chlorophyll .

### HOME WORK

Do it in copy .
