ADAPTATION IN ANIMALS

SUBJECT TEACHER-SONI KUMARI

We have discussed about terrestrial animals

Now we discuss about aquatic animals

AMPHIBIANS

Animals that live both in water and on land are called amphibians .

Frog , salamander are amphibians .

These animals cannot tolerate cold weather and hide themselves in warm Places .

They become inactive and go for long sleep .

This is called hibernation .

These animals store a lot of food in their bodies and use it during winters to survive .

Don't write only read it .

C . Cross (x) the odd one .

Aerial Animals

Pigeon

Parrot

Bat

Snake x

Crow

HOME WORK

Do CW in HW .
