BASED ON NCERT PATTERN

Chapter:-14, Our Mineral resources

C. Answer these questions.

1. What is the difference between minerals and ores?

Answer:- All rocks on the Earth are made up of natural substances called minerals. A rock that contains a large amount of a particular mineral is called the ore.

2. Into which two groups are the minerals divided? Write two examples of each.

Answer:- Minerals are divided into two groups

1. Metallic minerals:- copper gold
2. Non-metallic Minerals:- Coal , limestone

3 . Why are coal and petroleum called mineral fuels?

Answer:- Coal and petroleum are used as fuels . Therefore they are also called mineral fuels.

4 . How is an oilfield different from an oil refinery?

Answer:- An area with many oil wells is called oilfield. And the minerals oil which is extracted is refined in oil refineries to make petrol, diesel, kerosene and cooking gas .

5. Why should we use our mineral reserves carefully?

Answer:- The mineral reserves of the Earth are limited. They cannot last forever. So we must use the available minerals reserves very carefully.

Homework-Write and Remember.
