Lesson 8ৰ Decimal and Fractions

Dear students

आप निश्चित रुप से decimal fraction को समझने में problem feeling कर रहे हैं । कुछ बच्चे अब समझने भी लगे हैं । आइये फिर से समझें ।

Ex:- Arrange the following numbers in ascending order.

• 7.046,7.64,7.006,7.460

सबसे छोटा value वाला fraction को पहले रखेंगे फिर more value वाला and so on..

= 7.006,7.046,7.460,7.64

ध्यान से decimal number को देखिये | whole part of all decimal group is 7 so whole part is same.

After decimal we see the value of digit.सबसे small digit को पहले रखना है । फिर इसी प्रकार decimal के बाद सभी place पर number को देखना है की कौन smaller है and कौन greater.

Arrange the following numbers in ascending number.

- 20.082,20.280,20.802,20.028
- 65.213,65.123,65.332,65.021,65.210
- 500.38,500.083,500.83,500.8
- 3.922,3.991,3.229,3.929
- 60.001,6.001,600.1,60.012

Q. Arrange the following numbers in descending number.

- 329.92,392.92,392.29,329.0
- 22.075,22.705,22.507,22.2,22.22
- 40.04,40.042,40.402,40.4,40.41
- 0.056,0.050,0.0655,0.006
- 1.123,11,123,12.234,45.231
