CHAPTER ----. 01 (**THE CIRCULATORY SYSTEM**)

Dear, student today we will study the circulatory system of how the elementary present in our body work.

- In animals , transport of materials take place through the circulatory system.
- The circulatory system in human beings consists of blood, blood vessels and heart.
- Arteries carry oxygen rich blood from the heart to all parts of the body.
- Veins bring carbon dioxide rich blood from all parts of the body back to the heart.
- The heart is a powerful pump made up of cardiac muscle.
- The heart pumps blood to all parts of the body.
- The periodic contraction and relaxation of the heart muscle constitutes a heartbeat .
