## CHAPTER 1.---- THE SKELETAL SYSTEM

Dear Students,

The topic we will continue to read today is:

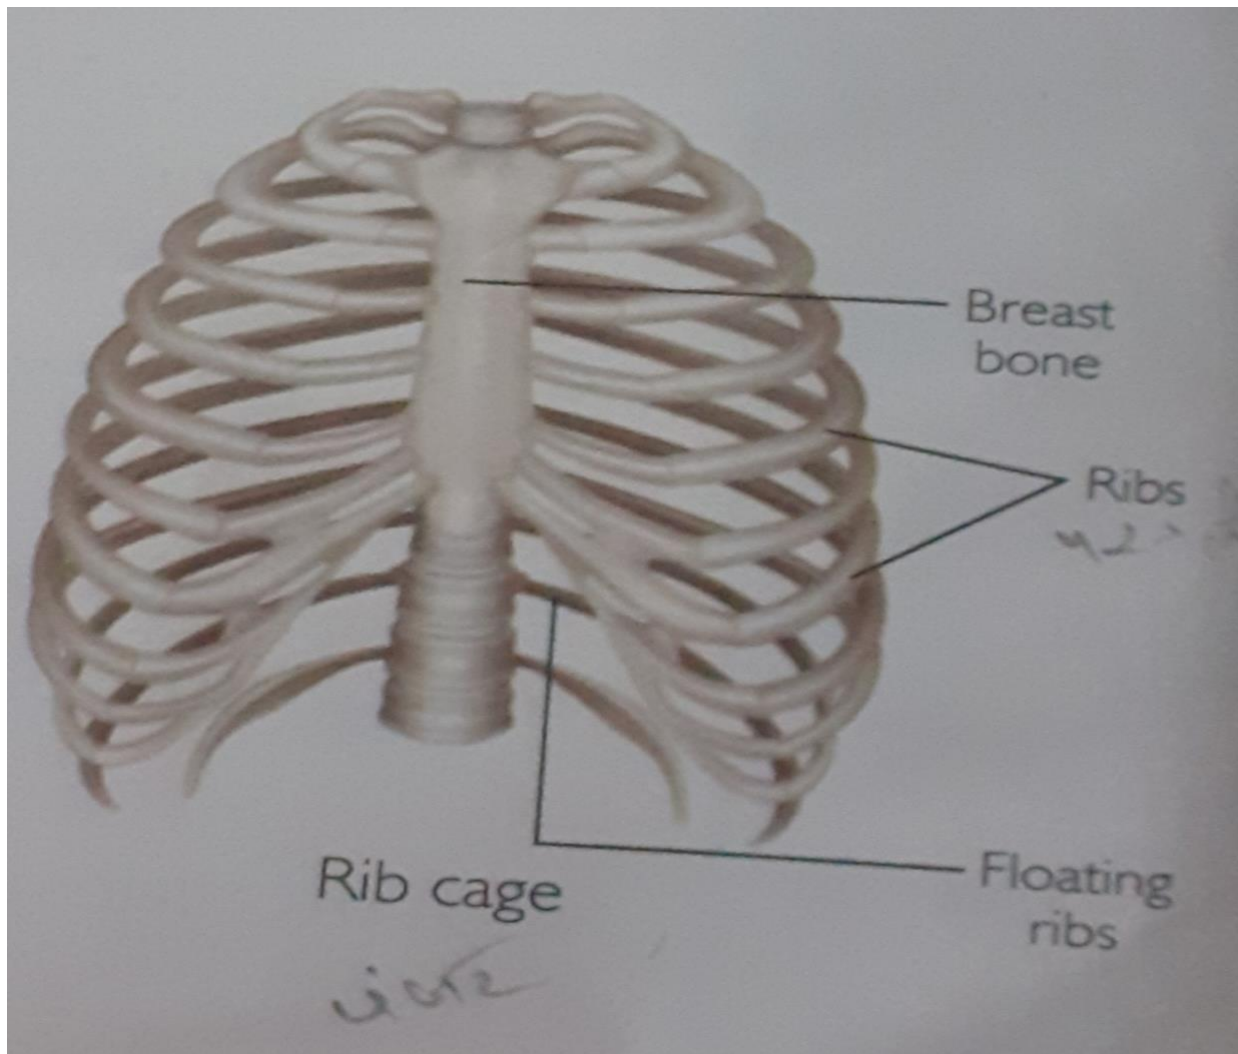

### **Major bones of the body :**

**The major bones of the body are the Rib cage.**

#### **1.RIB CAGE:**

The Rib cage is a cage like box . It is formed by 12 pairs of long curved bones called the **ribs** . all the 12 pair of ribs are joined at the back to

the backbone and the first 10 pairs are joined in the front of the back breastbone . The last two pair of ribs are free at the front and these ribs are called **floating ribs** . the Rib cage protect the heart and the lung from injury the

ribs swing up and down when we breathe . They do so to inflate and de flate our lungs.

**TO BE CONTINUE.....**

**IN H.W. SAME WORK LEARN AND WRITE .**
