

## CHAPTER 2. ---- THE SKELETAL SYSTEM

Dear Students,

Today, we will read more about what is **LIMBS** :

There are two pairs of Limbs in our body, example **forelimbs** and **Hindlimbs**. 1 pair of Limbs is a pair of forelimbs or arms. There is only one bone in the upper arm called **humerus**. Which fit into the shoulder girdle.

There are two bones in the the forearms, example **radius and ulna**.

Wrist, palm and fingers are made up of many small bones. Altogether each arm has 26 bones.
