SUBJECT - EVS

Based On NCERT

Date - 08/10/2020

Chapter - 9

Work And Energy

Magnetic energy : energy found in a magnet call magnetic energy . Which is stored in magnetic field . It is found in transformers and inductors

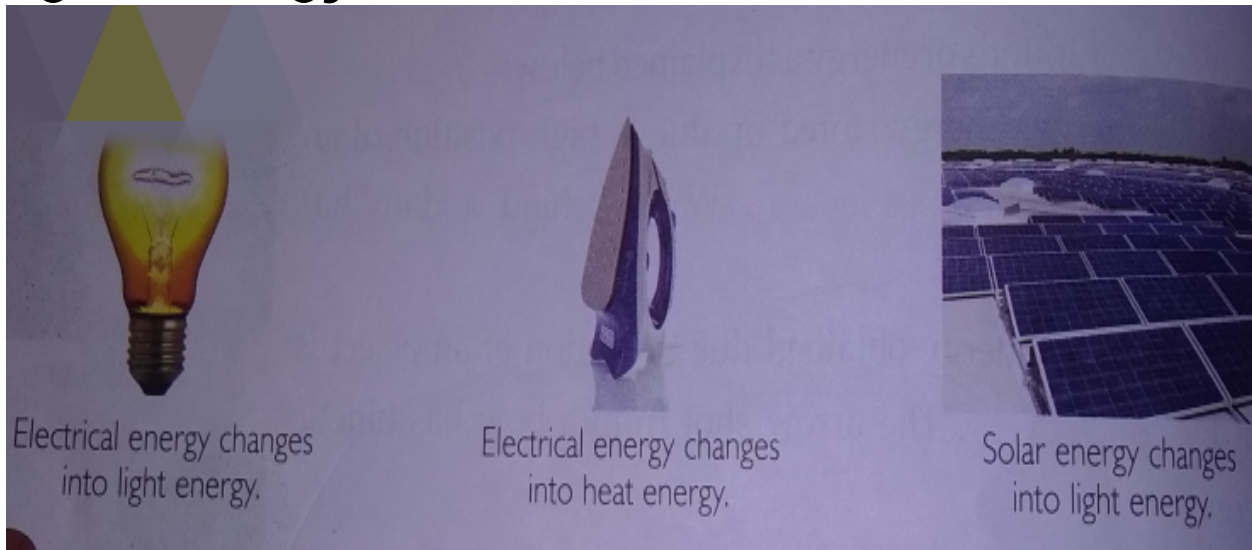

Chemical energy : energy stored in chemical is called chemical energy .

Fireworks and batteries have chemical energy .

Energy can change its from : energy can be changed from one form into another .

For example , in bulbs and tubelights , electrical energy change into light energy . Transistors and calling bells

change electrical energy into sound energy . Iron press and heater change electrical energy into heat energy . Is solar panel changes solar energy into light energy .

A. Write any one use of each of the following types of energy .

- 1. Magnetic energy :-**
- 2. Chemical energy :-**
