C. T – PRAGYA

BASED ON N.C.E.R.T PATTERN

CH – 13 (PERCENT)

INTRODUCTION : Percent means per hundred
Or every hundred . When the denominator of a
Fraction is 100 , we call it a percentage.

The symbol for percent is % .

Example : $15 / 100 = 15 \%$, $23 / 100 = 23 \%$

For percentage, we remove the denominator 100
And only write the numerator with the symbol of
Percentage % .

Example $9 / 100 = 9 \%$, $15 / 100 = 15 \%$

$3 / 100 = 3 \%$ $200 / 100 = 200\%$

Equivalent fractions :

Fractions into equivalent fractions with the
denominator as 100 .

Example : • $7 / 10 \times 10 / 10 = 70 / 100$

• $11 / 20 \times 5/5 = 55 /100$

• $12 / 25 \times 4 /4 = 48 /100$

Read and try to understand about fraction.

- Try to solve these questions.

Write the following fraction as per percent.

Use the % symbol.

A. $50 /100 = \text{-----}$

B. $30/ 100 = \text{-----}$

C. $45 / 100 = \text{-----}$

D. $73 / 100 = \text{-----}$

E. $69 / 100 = \text{-----}$

F. $100 /100 = \text{-----}$
