**Based On NCERT**

**Date - 15/09/2020**

**Chapter - 7**

**Interdependence In Living Beings**

## **FOOD CHAINS**

**A food chain is a pathway that shows how energy moves from one living things to**

**another living things in a given environment .**

**In a food chain , plants are eaten by animals , then these animals are eaten by other animals .**

**In other words , a food chain always begins with producers ( Plants ) . The producers are then eaten by herbivorous . Herbivorous are , in turn , eaten by carnivorous and omnivorous . This is how energy passes from one living things to another .**

**Don't write only read it .**

**A. Answer the following question .**

**1. What is the food chain ? Draw a simple food chain .**

**Home work**
