## **CHAPTER NAME: - GLOBE- LATITUDE AND LONGITUDE**

**(Geography Ch.—2 )**

### **TOPIC :-THE GLOBE**

**A globe is a model of the Earth it gives us a true picture of the shape of the earth.**

**Distance and directions are also represented.**

**The small ones are handy and can be carried easily.**

**The two ends of the axis are called the north pole and the South pole respectively.**

**The globe has lines drawn on its surface which form a Criss - cross pattern called the *grid***

**The east-west lines are called parallels of *latitude* will the north – south lines are called the meridians of *longitude*.**

The line which divides the globe into two equal halves is known as the *equator*

Half of the earth, north of the equator is called the *northern hemisphere* and the southern half is called the *southern hemisphere*.
