STUDY MATERIAL SCIENCE

CLASS-VI

Date : 06/09/2020

Teacher : Poonam Kumari

▶ 7. Getting to know plants

Flowering Plants: Plants which bear flowers are called flowering plants. Their bodies are divided into roots, stem, leaves and bear flowers and fruits

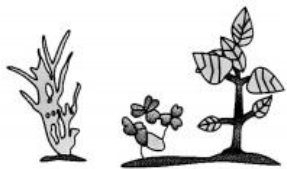

Herbs, shrubs and trees:

Plants are usually grouped into herbs, shrubs and trees on the basis of their heights, stem and branches.

Herbs : Plants with green and tender stem are called herbs. They are usually short and sometimes do not have branches.

Shrubs : Some plants have branches arising from the base of the stem. The stem is hard but not very thick. They are called shrubs

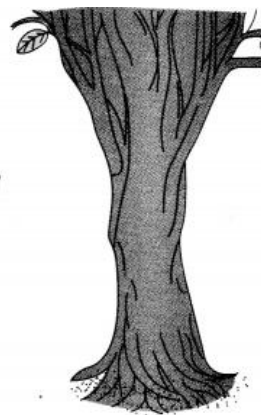

Trees : Some plants are very tall and have hard and thick stem. They have branches arising from upper part of the stem. They are called trees.

(a) Herbs

(b) Shrub

(c) Tree
