Subject: Insanitary condition of the locality

Dear Sir

You will agree that our locality is perhaps the dirtiest the district road as it becomes

muddy when a little rain falls. The water stays in the road almost all through out the year. The stagnant water creates pits and pools. These occur many fatal accidents due to these path holes. While the streets are full of water, the water-tops are generally dry. The electricity plays hide and seek all the time. The conditions are so bad that many people have already left this locality.

Please do something to solve these of this locality

Yours faithfully,
Ravi
