STUDY MATERIAL SCIENCE CLASS-VII

Date : 24-02-2021

Teacher : Poonam Kumari

▶ Heating & Magnetic effect of Electric current

A battery of two cells

- If we combine two cells by keeping the positive terminal of one cell in contact with the positive terminal of the other cell or negative terminal of one cell in contact with the negative terminal of the other cell, then the battery obtained will not work.
- The batteries which are used in cars, buses, trucks, inverters, etc., are also made of cells. There is a special feature of car battery is that its cells can be recharged. Ordinary cells, however, cannot be recharged.
