Natural vegetation and wildlife

Question 1.

How is water an important resource?

Answer.

Water is an indispensable resource of life. Firstly water serves the most basic purpose of drinking, without which life is impossible. It is helpful in cleaning our bodies, clothes and utensils. Farmers depend on water for irrigation. Water is also used in cooking food. Water is a source of electricity as well. Plants require water for their growth. Water is required for various industrial purposes in factories.

Question 2.

Write a short note on wildlife.

Answer.

The animal kingdom, which consists of animals, birds, aquatic creatures and insects, is called wildlife. These creatures provide us various important products such as milk, meat, hides and wool. Bees give us honey and help in pollination. They play the role of decomposers in the environment. Birds like the vulture are scavengers and they help in cleansing the environment. All forms of wildlife are an integral part of our ecosystem.

Question 3.

What are the major types of vegetation in the world? Describe vegetation in different rainfall conditions.

Answer.

The major types of vegetation in the world are grouped as forests, grasslands, scrubs and tundra.” In areas of heavy rain, huge trees can be found. Forests are abundant in areas of heavy rainfall. With moisture and rainfall the density of forests declines. In moderate rainfall areas, grasslands are found. In dry areas we find thorny shrubs and scrubs. Plants here have deep roots and leaves have thorny surface to reduce loss of moisture. The tundra vegetation consists of mosses and lichens.
