Question 1. The following graph shows the temperature of a patient in a hospital, recorded every hour.

- (a) What was the patient's temperature at 1 pm?
- (b) When was the patient's temperature 38.5°C?
- (c) The patient's temperature was the same two times during the period given. What were the two times?
- (d) What was the temperature at 1:30 pm? How did you arrive at your answer?
- (e) During which periods did the patient's temperature show an upward trend?

Solution:

- (a) The patient's temperature at 1 pm was 36.5°C
- (b) The patient's temperature was 38.5°C at 12:00 noon.
- (c) The patient's temperature was 36.5°C at 1 pm and 2 pm.
- (d) The temperature at 1:30 pm was 36.5°C. We have taken the mid value of 1 pm and 2 pm, i.e., 1:30 p.m and proceed perpendicularly upwards to meet the horizontal line showing 36.5°C.
- (e) During 9 am to 10 am and 10 am to 11 am, the temperature showed an upward trend.

Question 2. The following line graph shows the yearly sales figures for a manufacturing company.

- (a) What were the sales in (i) 2002 (ii) 2006?
- (b) What were the sales in (i) 2003 (ii) 2005?
- (c) Compute the difference between the sales in 2002 and 2006.
- (d) In which year was there the greatest difference between the sales as compared to its previous year?

Solution:

(a) The sales in the year 2002 was Rs 4 crore and in the year 2006 was Rs 8 crore.

(b) The sales in the year 2003 was Rs 7 crore and in 2005 was Rs 10 crore.

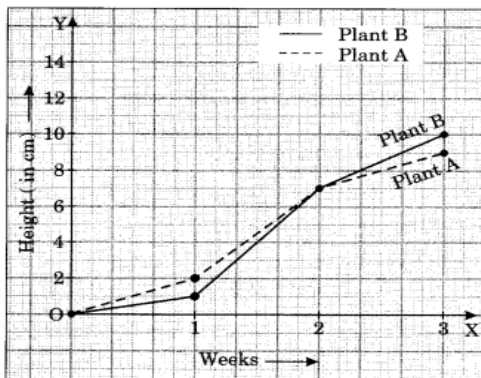

(c) Sales in 2002 = Rs 4 crore

Sales in 2006 = Rs 8 crores

Difference = Rs (8 – 4) crore = Rs 4 crore.

(d) The greatest difference between the sales was in the year 2005, as compared to previous year.

Question 3. For an experiment in Botany, two different plants, plant A and plant B, were grown under similar laboratory conditions. Their heights were measured at the end of each week for 3 weeks. The results are shown by the following graph.

(a) How high was plant A after (i) 2 weeks (ii) 3 weeks

(b) How high was plant B after (i) 2 weeks (ii) 3 weeks

(c) How much did plant A grow during the 3rd week?

(d) How much did plant B grow from the end of the 2nd week to the end of the 3rd week?

(e) During which week did plant A grow most?

(f) During which week did plant B grow least?

(g) Were the two plants of the same height during any week shown here? Specify.

Solution:

(a) The height of plant A (i) after 2 weeks was 7 cm (ii) after 3 weeks was 9 cm.

(b) The height of plant B (i) after 2 weeks was 7 cm (ii) after 3 weeks was 10 cm.

(c) Plant A grew 7 cm to 9 cm i.e., 2 cm.

(d) Plant B grew 7 cm to 10 cm i.e., 3 cm.

(e) Plant A grew most in a 2nd week i.e., 5 cm.

(f) Plant B grew the least in a first week i.e., 1 cm.

(g) Yes, the two plants grew the same height at the end of 2nd week i.e., 7 cm.
