Write a paragraph on " Encourage reading habit among children" .

(Word limit: 120-150)

Hints

not have reading habit the exposure to new technology

different kinds of books available

gain knowledge of life -

improves IQ level -

helps in mental and emotional development

schools should organize reading competitions

parents take their children to Book fairs

Ans.

ENCOURAGE READING HABIT AMONG CHILDREN

Children do not have reading habit due to the exposure to the new technology LCD, Laptop, iPod, etc. In their free time, they prefer watching TV, playing games on computer, listening songs than reading books. Parents and teachers should encourage children to have reading habit. Different kinds of books are available in the market starting from adventure, moral science, poetry, comics to biographies, science fiction, novel. etc. whose pages might hold you to resist the charm of computer.

Reading habit helps to gain knowledge of life. It not only improves IQ level but also helps in mental and emotional development. Schools should organize competitions that develop the reading habit among children. They should conduct reading sessions once in a week. Role play should be done on the book that they have read. Parents should take their children to Book fairs. Reading habit takes us in the another world and protect us from the negative effects off TV and computers.

Write it again in your own language.
