BASED ON N.C.E.R.T PATTERN

CHAPTER: 9 , THE TREELESS GRASSLANDS

Try to solve it part A AND B.

A . Tick the correct answer.

ANSWER:

B. Fill in the blanks .

ANSWER:

C. Answer this question .

ANSWER: 1. Temperate grasslands have hot summers and cold winters. Rainfall is moderate. The amount of annual rainfall influences the height of grassland vegetation, with taller grasses in wetter region .

- **Ans 2. The animal species such as prairie wolves, bison, prairie dogs, antelopes, rabbits, coyotes are found in the prairie grasslands.**
- **The varieties of birds such as eagles, hawks, and owls are found here.**

- **The cattle such as goats and sheeps are reared due to availability of grass.**
- **Ans : 3. The soil and climate of Prairies are the most suitable for the cultivation of wheat and maize. So the production of wheat is so large that USA exports surplus wheat to other countries. Therefore, the Prairies of North America are called 'Wheat basket of the world'.**

Ans: 4. Animals are reared on the western side of the prairies because that area consists of extensive grasslands on which animals can graze. That area is also not very suitable for farming as it is comparatively dry.

Ans 5. That is because the prairies are huge farms and human/manual labour is very difficult as they need to plough,sow,water,fertilize and harvest the crops. ... harvesters can harvest vast amounts of crops in minutes. thus the replacement of machines by human/manual labour is reasonable.

D. Think and answer.

ANS: It is because due to the fertile soils where different kinds of nutrient rich grasses grow on which cattle and sheep are reared in huge numbers which has grown over there as a larger industry.
