Class VI

Based on Course Book

Chapter- 4

Topic – Saving Dory

B. Answer these questions briefly.

4. How are clownfish dads different from regal blue tang parents?

Ans- Interestingly, Finding Dory shows Dory's parents as kind and nurturing. In real life, however, the parents don't care for their young. Baby blue tangs are carried away by ocean currents soon after they hatch, and are on their own from the very beginning. On the other hand, clownfish dads do watch over their eggs and fan them, which keep the anemones clean, and take care of the eggs.

5. Why is an aquarium not suitable for a regal blue tang?

Ans- An aquarium is not suitable for a regal blue tang because they are fragile and require specialised care, and in the wrong circumstances, die in large numbers.

6. What was the fate of the turtles which were bought as pets after the popularity of the Teenage Mutant Ninja Turtles?

Ans- The popularity of the Mutant Ninja Turtles, a series of comic book-based films about a group of pizza-loving, stunt-performing turtles, saw a huge increase in turtles as pets. But many of them were abandoned and even flushed away when their owners got bored.

B. Create sentences of your own using these words.

- 1. Aquarium:-** The fish die if they do not get specialised care in the aquarium.
- 2. Feat:-** Today, he stood up on his feet after the long bedridden due to illness.
- 3. Fragile:-** He looks fragile after prolong illness.
- 4. Predator:-** The wild animals are often called a predator.

5. . **Turtle**:- The story tells that simplicity and steadiness of the turtle beats arrogant rabbit.

HW- Do No. C at page no. 49.
